REASONS FOR ALLOWANCE

1. The following is an Examiner's statement of reasons for the indication of allowable subject matter: The closest prior art of record; Kewitsch et. al., U.S.P. No.6,169,830 teaches (Figs.1-17) an optical fiber and method of reducing polarization dependence in the cladding layer of an optical fiber by using controlled heating/cooling techniques. Kewitsch et. al.'830 (or any of the other references of record) fails to teach or suggest the claimed optical fiber including a core and a cladding surrounding the core with first and second eigenmodes propagating at different speeds which fulfills the equation listed in claim 1. Also, none of the references of record teaches or suggests the optical fiber secured over first and seound mounts with the specific interaction length, notch depth and PDL of the wavelength in the cladding being less than 0.5dB, recited in claim 13. None of the references of record teaches or suggests the optical fiber with the specific equations of claims 17 and 23. The aforementioned features are recited in claims 1- 24.
